CYBER FORENSICS SPECIALIST

Career Pathway

A Cyber Forensics Specialist is trained to retrieve digital information from computing devices. With the growth of cyber crime, law enforcement agencies as well as private firms charge Cyber Forensics Specialists with the lawful uncovering and retrieval of information contained on computer systems, hard drives, networks, smartphones and other electronic devices. For a career in this field, knowledge of storage devices, networking, firewalls, databases, encryption and mobile devices is a must. Cyber Forensics is a fast-growing field with abundant opportunities in both public and private sectors.
